"Catching the smallest flaws, crafting the grandest visions."

Hello, World!
My name is Taeyun Ryu
- a builder who values precision and purpose.

Dual-majoring in Global Business Administration and Computer Engineering at Hongik University, I'm passionate about cybersecurity and building secure, intelligent systems. With hands-on experience in malware analysis and DevSecOps tools, I thrive at the intersection of code and defense.

Beyond tech, I've also proven my leadership in the MICE

industry — planning large-scale events and winning national-level competitions. I believe in designing both systems and experiences that work seamlessly, securely, and meaningfully.

Education

St.Joseph School (Conway, AR)

2014.09 ~ 2015.07 (Sophomore)
